Product Highlight

Approved by European Central Bank (ECB). JL206 is a world leading product in shape design, internal design, function and application. JL206 is the ideal banknote counting and sorting solution for banks, retails and CITS.

Automated dust proof door and activated carbon filter ensure a healthy working environment for tellers and customers.

Dual CIS facing function for counterfeit authentication, new and old sorting, serial number identification and information communication.

A fully opened banknote transport makes an easy maintenance and a quick jam recovery.

JL206 support serial number identification, transmission, recording and management, which can be integrated into Cash Circulation Management System, to realize banknote circulation delicacy management.

JL206 series are easily be updated within 20 seconds via USB. And also support remote updating (data and image) and diagnosis (light-operated and on/off).

The LAN, RS-232 and USB interface extend the connectivity of JL206, which can be connected with external LCD, printer and PC for sorting report checking, printing and upgrading, to realize centralized management.

Models of JL206 Series

JL206V: Without thickness detection.

JL206F: With mechanical thickness.

JL206G: With Ultra-sound thickness.
